

Article for parish magazine November 09

***Time to Think About the Future?***

How would we cope if the oil for our tractors and lorries became too expensive to use? The cost of our food would increase as fuel prices increased. But what will happen when it finally runs out? Cuba faced this crisis when their oil supplies were cut off through sanctions. They found the answer in a renewal of their community life. Sustainable Thornbury invites you to a free showing at Oldbury Village Hall on Tuesday 24<sup>th</sup> November of two short films. The first explaining the oil resource issue (*Peak Oil – Imposed by Nature.*) The second, an inspiring story of how Cuba responded to the lack of oil (*The Power of Community*). There will be an opportunity afterwards to discuss the films. Doors open 7 pm for 7.30 pm start. Free admission. This film is the third event of a monthly series of talks and films looking at our future prospects in a changing world. More details on [www.sustainablethornbury.org](http://www.sustainablethornbury.org) or tel 416778.

Entry for What's On list:
